THE following advertisement was put is leed in May, 1948, in the "Boston Dally Times," and various other newspapers in the United States, by James 1. Witton, E44, the owner of the "Woodworth Facent," should stare I had alvertised my "FATENT STATIONARY CUTTER, PI, ANIMG, TONGREIMG, AND GROOVING MACHINE," throughout the United States:

"I take this method of answering the free uent Inquiries, by letter and otherwise, as to my opinion upon the narious notices through the papers, of the stationary Knife Plading Machines attempted to be palmed off upon several persons ignorant of their true worth. I would state for the information of their true worth. I would state for the information of the enquirers that they will find substantially the machine now offered by several protending, inventors, described in the 10th volunts of the Raper any of Arts, invented by Samuel Henthau, in the year 1791. A fite machine was patented in this country by one Hugler, some six teen years since, and suother one put up by Albert Richards, of West Troy, N. Y, and shaudoued shoult his same time. It ought to satisfy the public to know that after fifty eight years experimenting upon these machines, not one in use is of any value for the purposes costen plated.

I will furthelia a Stationary Knife Machine equal to any now in use, or to any offered by the pretending inventors, at the cost of the machines and five per cent for my trouble, May 19, 1819.

I denythat any person ever saw or heard of such machines and now to use. Sall nuch in assistence with usual theorems. "PLANING MACHINES.

intervention in European affairs:

The glorious old principle of non-intervention, which basse-med us our prosperity and the respect of other mations, is alruit to base-verally tried. It is anchored deep in our national policy, but the stoam of revolution which has been sweeping over the old world has reached our shares, and bids fair to tear it from its hold. We play that it may remain firm. Our success and history as a Republic, is a better aid to free dom than armies; and if we attempt to send armies, the next who looks here for aid may not find success, and the history only of a nation which toppled over in attempting to reach too far.

MINAGURE, December 39, 1851. {
The last week has been one of considerable activity in
the market. A larger amount of produce than usual has
come forward, and prices, if not as remomentile as might
be, havest all events been steady, and each ready for all
that comes in. Some larges have been of late cutartained
of a rise in prices, owing to scarcity almost, but, although
the fact seems underlable that central Europe is not as
plentifully supplied as usual, yet this consily certain that
Livermonlynices by the Canada exhibit a decline of 64 per

are still of the opinion that our farmers will find their account in sending forward what they have without delay.
The waveluruses are gradually filling up with grainRour accumulates rapidly also, and we think that the shipments next Spring must be large. The tables of exports
for the section of 1851, which we shall publish in a day or
two, with show that, although the past ceason has been the
third in succession in which our state has had bad times for
its crops, yet it has steadily progressed. Flour connex very s crops, yet it has steadily progressed. Flour come its crops, yet that steadily progressed. An invariant con-more to the figures of last year—and wheat exhibits a large failing off. But shipments of larloy, o da, and corn have largely increased, and from being a con-mucr of leef, pork-butter, &c., from other States, we have got to be exporter to a considerable extent. A NOVEL STEAMER FOR THE HUDSON RIVER. A correspondent of the Boston Atles, at Wash

ington says:

"There is a a drawing in the Navy Department of a new steamboat, which is about to be built in New York for the Hudson river, and which is to make the trip from New York and Albany in 5 hours. She is intended to compete with the New York and Albany Raifread. By the kindness of Commodore Skinner, we obtained her proportions, which are as follows: Longth of keel, 560 feet: length of deek 350 feet. She looks like a sword fish. There is 75 feet of keel at each end, extending out from the deek, which ahows itself above winter, and which is shord and pointed like the sword of a sword-fish. Both ends of the boat are alike, and her engines are to work both ways. She is not imtouched to turn round, but to work like a ferry boat. She is to be called the Georee Washington, and to have accommodations for 3,000 passengers. She will make the possage of 150 miles in tive hours. She has been designed and modeled by Mr. Davidson of New York.

CURE FOR F. OFFIG. -The Nashville American gives an account of a recent attempt at a remaway match in that city. The young lady, after descending to the arms of her lover, by means of a rope ladder, from her bed-room withdow, was in the act of starting from the parental manion, when the front door burst open, and out maked the father, mother, balance of the children, with sandry darkies, masseuline and feminine, all en dischabille. The father stormed and the mother servested; and the lover only presented a pistol, habitle. The father stormed and the mather entereated; and the lover only presented a pistol, and the Miss declared her intention to stick by

him.

The father then proposed to let marry them at home, which the lover assented to, that the business should be done up without waiting for daylight. This having been agreed in a minister was aroused from his slumbers, and put to the waste of operations. He soon fairly moosel the young ones, and all parties retired to their chamber once more. The American adds, that the royal adder remained bancing at the young lady's window until morning, but no further alternyl was ward to excurs.
